ALL ENTITIES ARE REQUIRED MY PERMISSION
TO USE FOR ANY PURPOSE

LABEL CURRENCY TYPE CORRECTLY

BY "HIGH" LEVEL PEOPLE/ENTITY "LOW" LEVEL PEOPLE/ENTITY

THE GOVERNMENT

NON - GOVERNMENT

THE BUSINESSES WILL BE "FORCED" TO OPEN OPTION
FOR THE PEOPLE TO USE BOTH "LOW" AND "HIGH" LEVEL
CURRENCIES THAT ISSUED BY BOTH "GOVERNMENT" &
"NON GOVERNMENT" ENTITIES WITH 3 OPTIONS:

1. GOVERNMENT CURRENCY.
2. NON - GOV CURRENCY.
3. MIX

THE SAVIOR VISION BODHI
THE GOD OF DESTRUCTION
THE MASTER OF CREATION
THE KING OF EVOLUTION

Full Version (with explanation and more details):

Currencies should be label into correct categories.

Now you have the public currencies that backed by official national Government vs the private currencies that made by non-GOV people.

The strategy I want to use it “labeling currency correctly”:

Made By Low Level People/Entity vs **Made By High Level People/Entity**

Made by high level people/entity: is all kind of currencies that created and backed by national government (including both physical cash paper and digital currency).

Made by low level people/entity: is all kind of private and public currency that made by non-GOV people including both centralized, decentralized.

You cannot using the words “made by non-GOV” because it is not a natural way for GOV to accept that. But the only acceptable word here is “made by low/high level people/entity/group/organization, etc.”

Why the big companies and the Government will willing to accept it?

Because now there is a “**safety protection guaranteed**” for them to make their own rule, own laws such as: 50% - 60% payment currency will through “made by high level people/entity” currency while 40% - 50% payment currency must via “made by low level people/entity”.

It is more than the just the financial money subject but also a big lesson for the people that the society contain both “low level” and “high level” people.

It will start from small company to big company to Government.
You have a choice between: receiving free money from “made by low level people/entity currency” to buy/pay the product services from company who accepting it vs works extremely hard to obtain the already “made by high level people/entity currency” (GOV).
The choice is yours !

And the most fair private currency at the moment is my stone rock currency where all people are equal to mine without any technology knowledge !

That is the only way to move forward, the only solution that can end the current currency war between nation or a new natural way to insert “money” into the current world financial system.

If any Government or entity want to use my special idea solution then contact me directly to discuss more.

The Next Big Thing In The World Financial System Is Private Currency

If you have knowledge about currency, money then you will know that the current financial system have many kind of different currency type since ancient time from real physical metals such as copper, silver, gold to fully fiat.

I can tell and guaranteed with you the next big thing in the world financial system is not the digital currency but the PRIVATE CURRENCY.

What is a private currency?

It means that currency will be created by anybody in the society, does not mean it must be “powerful” entity one.

But whether that private currency being accepted by the public, the Government, businesses and other entities or not, it is totally up to the creator of that private currency.

You will have 2 kinds of private currency: domestic vs international.

How to make the Government accept it in natural way?

Even if the Government want to accept it, they must find a real valid reason.

And I think the only way is using the “currency label” tactic like I have revealed not long ago. Because without put currency into correct category with label, there is absolutely no way for any government to accept and

legalized it ! Without official legalization, all private currency are worthless, meaningless !

The private currency can have all kind of database structure from centralized to decentralized to mix. And it could be physical asset backed or fully fiat (made by human intelligence one).

If you ask the reason for “private currency” to be appear then my answer is to make life more interesting, to solve the society problem around financial matter, to educate people more about money currency and life.

The private currency won't able to replace the current world financial system but only the additional one.

I do not see any other direction nor solution other than “private currency”.

Whether you believe me or not, it is totally up to your level of mindset wisdom.

Thank You,

The Bodhi

The Only Way For The Governments To Print More Money Without Resources Is Using My Label Tactic

I have revealed my special “currency label” tactic already and some of you should already know it.

As you know the current world financial system are still based on resources (despite the fact on the public media called it as “fiat money”.)

Why ?

Because those people who in charge of the authority Government are not “always right/correct” with their shot calling. Therefore they have no power to issue endless money out of their will just because they are the “elected” person.

And the truth is most of so called world leaders are win and elected by a small amount of voters (very often less than 50% if you calculate the people who refused to vote).

The only way for the official governments to print more money without resources or any kind of sacrifice is they must allow the “opposite” public people to do the same.

From my point of view (a very high level person that on par with God), the amount of real “fiat money” printed by the government must be equal with the amount of “fiat money” printed by the private sector (the public people).

And the only way to make it become reality is you must using my currency label tactic between “made by high level person/entity” vs “made by low level person/entity”, then make it into official law of life.

Without allow the “low level” public people to create their own kind of currency, there is no way the top neutral referee will ever accept and allow any government to print any kind of real fiat money (without resources).

So what the final new financial system will be ?

It will contain 3 currencies type:

1. The current existing one that are secretly backed by resources.
2. The new “made by low level person/entity” currency created by the public people (fully fiat).
3. The new “made by high level person/entity” currency issued by the authority government (fully fiat).

But the catch and some small rule here is:

– The total amount of the new fiat money from both the high level + low level must no larger/higher than the amount of current existing currency that secretly backed by resources.

– The total amount of the new “made by high level person/entity” currency must be equal with the new “made by low level person/entity” currency.

Example:

– The total amount of current currency that secretly backed by resources is 100 Trillion.

Then the total amount of currency “made by high level person/entity” must be equal “made by low level person/entity” which = 50 trillion (100 trillion in total).

In order to avoid conflict and easier to spot then the new banknote designed are required, such as only allow to print 1 or 2 big bank note with the words “made by high level entity” of 200/500/1000 dollar or 1000/2000 rupee or something like that.

Then the government must now giveaways but must collect/exchange the new one for the old one bank note from the public people.

I think that is the only way to move forward, the only way for any national government to able to print any kind of real fiat money (by human intelligence).

Do not believe me ?

Just try it or ask the top neutral referee entities to check out my words !

Anyway, don't forget to obtain the license/permission from me the author if you want to use any of my idea, vision, solution, tactic, strategy.

Thank You,

Vision Bodhi

I Am Offering, Selling My Special Currency Label Tactic To All Beings, Entities, Government

The only way to end the current currency war and help national government able to “insert” new money into the financial system without the need of either natural resources or “sacrifice” is using my new special currency label tactic.

I have revealed that special information via image in my previous post. If you have not yet read, then you should read it now.

By officially label currency into categories “made by...”, the government will have new way to receive free money from the society by exchange new designed note with that new “words” for the current fiat money paper from the public people. And I think that is a new to “collect tax” secretly.

Not only that, by using my special currency label tactic, nation will able to create new law that allow both the public government currency and private currency exist in harmony since now there will be a “barrier” that can be set, new rule/law that can be made easier such such 50-60% the business transaction or digital transaction must made via government backed currency or 40-50% transactions made through “low level made” currency.

Beside the government, I also want to offering/selling that special tactic to all the stock market, trading platform and companies, businesses.

Due to the sensitive, all of the agreement will be carried via physical in-person meeting to make sure everything is correct.

I have also shared/revealed my personal contact information so feel free to contact me as soon as possible.

Vision Bodhi

Reasons Why Real Legal Private Currency Is The Only Way To End The Financial War

If you do not want to trade with USD, Euro, Yen, Yuan, Rub, etc. and also do not want to trade with gold, silver, copper, etc.

The only option left is via a new international currency created by private entity but will be secretly owned by many big nation at the same time.

It cannot be formed/created by official national government because it is unnatural since they already issue their local national fiat money paper.

But the only way for any non-Government currency to be exist is it must not “clash” with the current government currency and it must be officially accepted by the governments via law !

The only way to make that occur is using my special “currency label” tactic. Only by doing that, the government can have valid natural reason to accept, to recognize, to make it into law and also the public people can understand and able to separate between the currency made by the government authority vs currency made by non-GOV entity.

What the government could make law with the private currency ?

- They can make law like: remove all the VAT tax for payment made by “private currency” in order to promote the fairness between “low level” vs “high level” person in the society.
- They can set a percentage of minimum and maximum amount each “private currency” can be used in each industry.
- Nations can accept new private currency(s) (that owned, managed by an international company that have all the persons from all core nations) for the international transaction business.

Etc.

But in order to make that happen, you must use my “currency label” tactic so that the private currency can be accepted and people can understand it.

Private currency here means all people, all entities can be able to create currency with their own “dream” but whether that private currency can be accepted by the public, the government, the business, the God, the deity and others, it is another story.

I don't know whether you can understand my vision, my tactic or not but I think that is the only solution left that can be able to end the currency war.

It is completely risk-free to try my method/tactic.

If any entity wants to end current world chaos or wants to become rich, then just invest in my vision, my tactic.

The Savior Vision Bodhi

How The New World Financial System Should Be With Private Currencies

The current world financial system need a big upgrade.

Throughout the history since ancient time, you already have many small “evolution” and big change in the society such as the appear of monarchy, the appear of monopoly dynasty, the appear of asset currency, paper currency, etc.

And none of them are “compulsory” and able to have big impact forever in the society.

Most of that big feature and entities still exist but their influence are significantly reduce at the moment.

All the current world chaos from Asia to Europe at the moment only have only 1 answer: private currency officially.

I have talked and revealed my thinking, my solution around that subject already.

The current world financial system structure: 100% money issued by the authority government.

The new world financial system with private currency will be: 50% to 60% money issued by the authority government + 40% to 50% private currency issued by any non-GOV entities.

The real % is depend on each nation but the barrier is 50%.

By that structure, the core of this financial system still remain.

Private currency here could be made by the local political parties or group of company or businesses or any individual people but most likely will be the political parties since they are the closest level with the government.

Private currency are just like any video games, they are absolutely pointless meaningless if you cannot make people work !

The rules, the format of private currency are created and made by that owner/creator, does not and cannot have any particular rules.

Here I mean not only digital but also fiat money paper.

How crazy to think a non-GOV currency in money paper could be accept and exist along the GOV currencies ?!

I don't think any of you have gut to think about that scenario yet.

Private currency are worthless if it not officially accept by the highest level of government authority since most sellers, businesses will never accept any kind of non-GOV currencies except physical assets (have it own value).

But by my special currency label tactic which help the authorities and people to accept and recognize, everything now will be possible and accepted.

Of course, it is totally depend on your level of mindset to agree with my big vision or not.

But to me, that is the only way to end the current world deadly world chaos between groups, nations around financial matter (mostly related to natural resources).

I think if you do not try my solution then it will be 100% of mega disaster such as nuclear war since there is no other choice left. And the survival will wake up and recognize that they must try my private currency tactic.

It is better try it now than later !

It is a real evolution in the society !

With my private currency solution, the “level of playing field” between all nations will be the same because that is where both the “rich” and “poor” natural resources nation are on the same floor since now they can create a real fiat money without any kind of resources backed (50% total).

Welcome to a new real economy war between not only nations but also between all political parties around the globe !

I can foresee that future but whether you can or not, it is totally up to all of you.

It could occur this year or next year or others (totally depend on the actions from the rest of you from this civilization).

No matter what God appear, the only way to end the current world chaos conflict is by making new real public product service (no any hidden secret agreement between any entities).

Do not listen to any fake master, fake listen, stupid entities or any kind of spiritual teacher, fortune teller, etc. most of them was/are deceiving many of you !

That is the truth of life.

Just try, just test my solution in the public then you will know that “I am the real Messiah” that all of you was/are looking for !

Thank You,

The Messiah

World Peace Will Only Come When You Try My Solution

World peace can only come with new real life public products services.

Even all kind of high level deity such as Jesus Christ, Lord Shiva, Kwan Yin, etc. come, they just cannot stop the current deadly war by their presentation alone !

I have revealed my core solution in full and I have put myself in the position of the GOV, the businesses, the public user, the neutral referee and the high level deity.

And I don't think you can find any better idea, better solution than mine for the current world conflict that mostly related to financial matters.

If you want to test, to try my solution is correct or not then the only way is making it become reality for the rest of this civilization to try.

I strongly believe my idea, my solution is the only way to move forward, the only tactic that can end the current deadly war chaos.

I do not in the position of directly carry any kind of project due to lack to resources, support and motivation. So the rest of you must do that easy task.

All of you are racing against time since the entities who did gave out orders do on their own position, their own situation without mercy.

I think that is the best I can do, I can help this civilization as the “Savior”. Whether you guys believe or willing to try my solution or not, it is totally up to you !

Thank You,
The Bodhi
